SUMMARY

Full-stack software engineer with roots in web development dating to 2012 and four years of production application development in Ruby on Rails and JavaScript ecosystems. Core strengths in Rails application development, legacy system modernization, and CI/CD pipeline implementation. Built and maintained healthcare software within a 10,000+ employee organization operating across 46 states. Bilingual in English and Spanish.

SKILLS & TECHNOLOGIES

Languages: Ruby, JavaScript, TypeScript, Python, SQL, HTML/CSS, Groovy

Frameworks: Ruby on Rails, Express.js, Django, Next.js, Hotwire, AngularJS

Frontend: React.js, Redux, Styled-Components, Sinatra

Databases: PostgreSQL (v14–15), MongoDB, Firebase, SQLite, GraphQL

Cloud & Infra: AWS (SNS, S3, EC2), Docker, Docker Compose

Testing & CI/CD: rSpec, FactoryBot, Jenkins, Mocha, Chai

Tools: Jira, Confluence, Bitbucket, DataDog, Figma, JetBrains IDEs, VS Code

AI Tooling: LM Studio, Claude Code CLI, n8n, Docker MCP (exploratory)

EXPERIENCE

Select Rehabilitation | *Application Developer* | Chicago, IL (Hybrid) 06/2021 – 08/2025

- Built features for the Access Manager Rails application, an employee management and authorization tool used within a 10,000+ employee healthcare organization operating across 46 states.
- Developed tablet-optimized frontend using Hotwire for Direct Bill Intake, delivering a responsive single-page feel within the Rails ecosystem.
- Implemented patient outreach workflows with ActionMailer, generating PDF intake forms and routing data securely via AWS SNS and S3.
- Contributed to CI/CD pipeline construction using Jenkins, rSpec, and FactoryBot, enforcing automated testing and business logic validation on all merges to development branches.
- Drove legacy modernization of Karefirst EMR from PHP/Laravel/AngularJS to Ruby on Rails, resolving data-correctness bugs and ensuring functionality parity across platforms.
- Built a feedback system capturing browser diagnostics and user descriptions, auto-creating Jira tickets and triggering support email workflows.
- Managed environment-separated AWS S3 backups and oversaw deployments, hotfixes, and releases across demo-training and production servers.
- Made architectural decisions on project structure, data modeling, and service integration; conducted code reviews across all team projects in Bitbucket.

Upwork | *Freelance Software Developer* | Remote 06/2021 – 10/2025

- Delivered web development projects across multiple client engagements using Rails, React, and JavaScript ecosystems.

Mauri Pro Sailing | *Web Content Developer* | Frisco, TX 04/2012 – 04/2016

- Managed a product database of 20,000+ items and built SEO-optimized product pages using HTML and CSS.
- Mentored interns on web content development workflows and coding practices.
- Represented the company at industry trade shows and led in-person meetings with major suppliers including Harken, Lewmar, and Gill.

EDUCATION

Flatiron School — Full-Stack Software Development (Ruby on Rails & JavaScript) 2020

University of North Texas — Bachelor of Arts in Psychology 2012
